Phone: 248-278-1152 — Email: [achiwha@umich.edu](mailto:achiwha@umich.edu) — Github: [achiwhane](#) — Linkedin: [/in/achiwhane](#)

## Experience

### Anduril Industries

Seattle, WA

*Software Engineer – Platform Infrastructure (Live Data Systems)*

*May 2021 – Present*

- Enabled more flexible and efficient user workflows through designing and implementing conflict-free, eventually-consistent, real-time replication infrastructure, client services, and developer SDKs (Go, FoundationDB, Kubernetes, NixOS)
- Built real-time messaging system to seamlessly interface and communicate with multiple military data links and communication systems (Go, Kubernetes)

### DRW

Chicago, IL

*Senior Software Engineer – Risk Management*

*April 2019 – April 2021*

- Enabled novel, real-time analysis and event detection workflows by designing and implementing real-time derivatives risk decomposition system (Python, Elixir, Kubernetes)
- Redesigned and scaled existing settlement risk analysis pipeline using a functional, reactive architecture (Elixir, C++, Kubernetes)
- Managed and mentored apprentice to successfully deliver greenfield services from initial concept to production deployment (Elixir, Kubernetes)

### DRW

Chicago, IL

*Junior Software Developer – Trading Infrastructure*

*July 2018 – March 2019*

- Improved API response times of internal trade volume monitoring tool by 30x (Ruby on Rails)
- Implemented and integrated an LCH margin calculation tool into internal margin calculation framework to simulate portfolio margins under different market conditions (Clojure)

### DRW

Chicago, IL

*Software Engineering Intern – Soybean Options Desk*

*June 2017 – August 2017*

- Provided insight into new trading strategies for agriculture options markets by building data analysis tools and high-throughput backtesting pipelines for traders (Python, numpy, pandas, slurm)
- Improved efficiency of trade capital monitoring system by writing Tableau Web Data Connectors (JavaScript, Flask)

### Deepfield Networks

Ann Arbor, MI

*Software Engineering Intern*

*May 2016 – September 2016*

- Improved speed and robustness of critical part of DDoS (Distributed Denial of Service) attack detection pipeline by architecting, developing, and optimizing DDoS analysis library (Python)
- Gained familiarity with Agile and scrum (Atlassian Jira), test-driven development, and continuous integration methodologies (Jenkins)

## Skills

**Programming Languages:** Go, Elixir, Python, C++

**Frameworks/Technologies:** gRPC, FoundationDB, Kubernetes, Erlang/Elixir OTP, PostgreSQL, Django, Tornado, Flask, Redis, Jupyter Notebooks, scikit-learn, pandas, MySQL, slurm, Hadoop, MapReduce

**Languages:** English (native fluency), Marathi (native fluency)

## Education

### University of Michigan

Ann Arbor, MI

*B.S.E in Computer Science*

*September 2014 – April 2018*

- **Key Courses:** System Design in C++, Distributed Systems, Operating Systems, Networks, Web Databases & Information Systems, Machine Learning, Artificial Intelligence, Computer Organization, Data Structures and Algorithms, Linear Algebra, Probability
